Subject Index to Volume 10—1988

Ag-In-Pd casting alloy, 2:14
Amalgam
  cast gold and composite compared with, in restoring retained roots, 1:28
  fluoride-containing, 6:19
Aminefluoride, mouthrinse containing, effect on enamel surface free energy, plaque and gingivitis, 5:3
Attitudes, of general practitioners, toward pit and fissure sealant use, 2:9
Autopolymerizing sealant, visible-light-activated sealant compared with, 1:14
  for fixed partial denture, 3:10

Book reviews
  Hydroxylapatite implants, 4:32
  Pediatric Dentistry: Infancy through Adolescence, 5:9
  Review of Diagnosis, Oral Medicine, Radiology and Treatment Planning, 3:9

Carbohydrates, sulcus depth and, 4:20
Caries, nursing, 2:3
Cavity preparation, effect of wearing surgical gloves on, 6:16
Cements, fluoride-containing, 6:19
Chewing sticks, toothbrush handle for use of, 6:7
Chlorhexidine, sustained release delivery system of, effect on plaque accumulation, 1:23
Composite, amalgam and cast gold compared with, in restoring retained roots, 1:28
Continuing education, pit and fissure sealant use and, 2:9
Corticosteroids, in acute apical periodontitis, 1:7
Craniomandibular disorders, 3:27
  exam and data collection for, 5:26
Cysts, mucosal-antral, radiographic appearance and differential diagnosis of, 1:3

Dental health, during orthodontic therapy, 1:11
Dental prevention
  oral prophylaxis in, 2:18
  in psychiatric hospital, sanguinarine delivery systems for use in, 2:25
  recall system for, 2:18
Dentifrices
  fluoride, comparison of, 3:14
  prevention and removal of tooth discoloration and, 5:15
  sanguinarine, in psychiatric hospital, for dental prevention, 2:25
Diet
  nursing caries and, 2:3
  sulcus depth and, 4:20

Education, continuing, pit and fissure sealant use and, 2:9
Enamel
  effect of zinc chloride mouthwash on, 4:3
  lamellae of, sealant penetration into, 4:15
  surface free energy of, effect of aminefluoride-stannous fluoride-containing mouthrinse on, 5:3
Ethylcellulose, chlorhexidine and, effect on plaque and gingiva, 1:23

Fixed partial denture, provisional, using visible light curing resin system, 3:10
Floss-holding device, compared to hand-held floss, 4:6
Fluoride
  dentifrices containing, comparison of, 3:14
  mouthrinse containing, effect on enamel surface free energy, plaque and gingivitis, 5:3
  nursing caries and, 2:3
  restorative materials containing, 6:19

Gingivitis
  effect of aminefluoride-stannous fluoride-containing mouthrinse on, 5:3
  floss-holding device compared with hand-held floss and, 4:6
Glass ionomer cements, fluoride-containing, 6:19
Gloves, surgical, effect on preclinical operative technique, 6:16
Gold, cast, amalgam and composite compared with, in restoring retained roots, 1:28

Imaging
  mucosal-antral cysts and, 1:3
  of temporomandibular joint, 6:25
Inlay/onlay restorations, using Ag-In-Pd casting alloy for, 2:9
Insadol, control of periodontal disease by, 5:18
Insurance
  coverage of pit and fissure sealants, 2:9
  oral prophylaxis recall system and, 2:18
Intracoronal restorations, using Ag-In-Pd casting alloy for, 2:9

Lamellae, in enamel, sealant penetration into, 4:15

Mentally handicapped adults, electric versus manual toothbrush for, 3:23
Meswak oral hygiene aid, toothbrush handle for use of, 6:7
Mouthwash, zinc chloride, effect on plaque and enamel zinc levels, 4:3
Mucosal-antral cysts, radiographic appearance and differential diagnosis of, 1:3
Multivitamins, sulcus depth and, 4:20

Nursing caries, 2:3

Oral hygiene
  Meswak aid for, toothbrush handle for, 6:7
  during orthodontic therapy, 1:11

Pain, in acute apical periodontitis, 1:7
Patient acceptance
  of floss-holding device, 4:6
  toothbrush design and, 5:10
Periodontitis
  adjunct systemic chemotherapeutic agent for control of, 5:18
  apical, acute, corticosteroid use in, 1:7
  subgingival bacteria and, 6:10
Pit and fissure sealants
  attitudes of general practitioners toward use of, 2:9
  frequency of use of, 3:17
  unfilled, tinted, comparison of, 1:18
Plaque
  effectiveness of prebrushing mouthrinse on, 6:3
  effect of aminefluoride-stannous fluoride-containing mouthrinse on, 5:3
  effect of zinc chloride mouthwash on, 4:3
  floss-holding device compared with hand-held floss and, 4:6
  slow release delivery system of chlorhexidine and, 1:23
  toothbrush design and, 3:3, 5:10
Product news
  ADA marketing publications for dental specialists, 3:22
  Colgate-Palmolive mouthwash, 3:30
  DynaPro hygienist handpiece, 4:32
  long-lasting gel to combat xerostomia, 4:32
  straight-handled toothbrush, 5:25

Protein supplements, sulcus depth and, 4:20
Psychiatric hospital, sanguinarine delivery system in, for dental prevention, 2:25

Radiography
  mucosal-antral cysts and, 1:3
  of temporomandibular joint, 6:25
Resins, fluoride-containing, 6:19
Restorations, fluoride-containing materials for, 6:19
Rinse
  containing aminefluoride-stannous fluoride, effect on enamel surface free energy, plaque and gingivitis, 5:3
  prebrushing, effectiveness of, 6:3
  sanguinarine, in psychiatric hospital, for dental prevention, 2:25
Roots, retained, restoration of, cast gold, amalgam, and composite compared in, 1:28

Sanguinarine delivery systems, use in psychiatric hospital, for dental prevention, 2:25
Sealants
  autopolymerizing, visible-light-activated sealant compared with, 1:14
  frequency of use of, 3:17
  penetration into enamel lamellae, 4:15
  pit and fissure
    attitudes of general practitioners toward use of, 2:9
    unfilled, tinted, comparison of, 1:18
  visible-light-activated
    autopolymerizing sealant compared with, 1:14
    provisional fixed partial denture using, 3:10
Silicate cements, fluoride-containing, 6:19
Staining, dentifrice to prevent and remove, 5:15
Sulcus depth, diet and, 4:20
Surgical technique, effect of wearing surgical gloves on, 6:16

Temporomandibular joint
  biomechanics of, 4:23
  diagnostic imaging of, 6:25
Temporomandibular joint disorders, 3:27
Toothbrush
  design of
    effect on dental plaque scores, 3:3
    plaque reaccumulation and patient acceptance and, 5:10
  electric *versus* manual, for mentally handicapped adults, 3:23
Tooth discoloration, dentifrice to prevent and remove, 5:15
Trace elements, sulcus depth and, 4:20

Visible-light-activated sealant
  autopolymerizing sealant compared with, 1:14
  provisional fixed partial denture using, 3:10

Weaning, 2:3

Zinc chloride, effects on plaque and enamel zinc levels, 4:3
